

DEK Snow Blower 24" Skid-Skis (model SK01)

If you have difficult, uneven terrain &/or challenges manoeuvring your new BEAST, STANLEY or DEK snow blower, you may be interested in our 24" Skid-Skis accessory.

These heavy-duty Skid-Skis (model SK01) are designed for use with BEAST, STANLEY and DEK commercial snow blowers in difficult terrain conditions. The Skid-Skis, which replace the OEM skid-shoes, will guide your snow blower over most gravel, pot-holes, frozen grass and other uneven surface characteristics. The Skid-Skis significantly reduce the frustration of clearing over uneven surface characteristics that would repeatedly stop snow blowers with conventional skid-shoes in their tracks. In addition, the side-bevels on the bottom surface make turning easy, delivering superb mobility even in deep snow conditions.

Features:

- Recommended over conventional skid-shoes for gravel and uneven surfaces
- Beveled sides dramatically improve turning and manoeuvrability
- Heavy-duty 1/4" cold-rolled steel construction for long-lasting durability
- Powder coat finish reduces corrosion
- Replaces the OEM skid-shoes using the same attachment points
- 30 Day Limited Warranty

The DEK SK01 Snow Blower 24" Skid-Skis are priced at \$199.99 plus applicable taxes.
